

## AHCI Assessment 2 collected data for STG usability study

### What was the most difficult part of the website and what made you struggle in it?

- P1 Not enough details in some parts - have to figure it out yourself.  
Specifically selecting classes and prioritising days off by the actual day.  
Slider is kinda odd.
- P2 Annoying that you have to click that add button rather than just clicking enter.
- P3 Lost track of where I was (pressed the today button) in the calendar. Everything else was intuitive.
- P4 Didn't know what some stuff did, didn't know about the slider and it wasn't clear. Select filters wasn't clear if that added filters to the timetable for papers.
- P5 Timetable filters, (thought they got applied, did not press button). Clarity of select filter button. (is it a button)?
- P6 No stream selection Filters are a bit tricky.
- P7 The scroll bar was confusing.
- P8 Looking through the different timetables. It wasn't clear.
- P9 Finding the tuesday off. Slider wasn't obvious
- P10 Getting rid of the class on tuesday. Didn't read everything, 'Slide to view text was small' and didn't know that it was a slider.  
Didn't know what the filters were changing, it wasn't clear.

### What were your initial thoughts of the website did it look good, bad how (initial perception)

- P1 Quite clean and professional.
- P2 Follows AUT styling well, slider is a bit confusing.
- P3 Great design, typical AUT, fits right in.
- P4 Simple, but better than what we have now. It's has cleaner format.
- P5 'Handy as hell' Very purple (on theme) Be good to specify specific time off, but the slider helps speed things up. Makes its really obvious when sessions are fixed. Make it more obvious that a slider.
- P6 Useful too bright(the purple) i prefer the darker colours.
- P7 Easier than AU's. simple.
- P8 Generally quite easy and to understand. Except the slider, it wasn't obvious. But very good once I knew what it did.
- P9 Alright.
- P10 Really cool, easier to pick papers.

### Which part did you get stuck at?

- P1 Quick easy access to see all the timetables
- P2 Understanding if classes clashed or not, (some text was cut off).
- P3 Calendar today button
- P4 How to change the timetable (slider issue again) and how to apply restrictions.
- P5 Didn't really get stuck.
- P6 Finding a timetable, the last section.
- P7 Scroll bar, finding a timetable.
- P8 Sliding through the timetables.
- P9 Looking through the timetables. (Slider). Clicked the today button which made me get lost and lose the calendar.
- P10 Viewing the different timetables.

### What was your favorite feature of the website

- P1 Select exact days off instead of just a priority.
- P2 Autocomplete search bar.
- P3 General functionality (useful) and the slider is really nice. I liked the filters criteria part. Earlier start.
- P4 Can view every timetable options (the functionality is good). I liked the slider once I knew what it did.
- P5 Visualization is great, good to see the fixed sessions. (I know what ones are not changeable.)
- P6 The calendar itself.
- P7 Simplistic.
- P8 Filters were good to find the best choice
- P9 Filters. Having more choice. Quicker than arion.
- P10 Viewing the timetables, it was really easy to find a timetable once I knew how to use it. All on one page. Functionality and UI is good.

### What would you like to see added to make it easier?

- P1 Select exact days off instead of just a priority.
- P2 Not sure.
- P3 Baby proof the calendar and pressing enter when you enter a class (rather than add button).
- P4 More flexibility in terms of personal choice. (blacking out certain days before generating).

P5	Animation for slider, make it clearer.
P6	Stream selection.
P7	More clarity with slider.
P8	Make the slider bar more obvious. (explanation or description). Saving timetable.
P9	Clearer label, the weeks were confusing.
P10	Bigger text for the slider, more colours / different shades.

**Did you feel you needed more time?**

P1	No.
P2	No.
P3	Nah.
P4	No.
P5	No.
P6	No.
P7	No
P8	No
P9	No
P10	No.

**If you had another go would it be easier for you now that you have used it once?**

P1	100%
P2	Yeah, now that I understand what the slider does.
P3	Yeah i suppose, it's pretty intuitive.
P4	Yes definitely.
P5	Yes
P6	Ofcourse, getting more familiar.
P7	Yeah.
P8	Of course.
P9	Yeah.
P10	Yes.

**Do you think you used all the features that the website had to offer?**

P1	Yeah I'd say so.
P2	I didn't use the filters, I was a bit confused the button says prioritise day off, but what day?
P3	Nah, I missed the details on the right, and I didn't use the filters.
P4	Not really, I didn't use the filters. Didn't look at the info on the right.
P5	Obviously not, I missed the filters (or pressing the button)
P6	Didn't use the other selection criteria. Didn't touch developers.
P7	Didn't really use the filters.
P8	Yeah.
P9	Didn't really know what the right hand side info was for
P10	Yes

**Did any parts of the website not work?**

P1	Not that i know of.
P2	Not that I noticed.
P3	I couldn't apply the filters correctly, usually I would expect the checkbox to apply rather than press a button.
P4	No
P5	It all worked
P6	No
P7	Everything worked.
P8	Sometimes the filters didn't seem to do anything.
P9	No.
P10	No

**List of all the issues that you noticed.**

P1	I didn't notice any.
P2	Text cutting off on boxes.
P3	Couldn't choose day off. Didn't want to check the calendar, juts fill out a day off.
P4	Didn't notice the drop down buttons in paper filters, they look like buttons not dropdown choices. Pressed select filters after generating timetable.(reset it again)
P5	Confirm instead of select filters at the start of the app. (clarity of buttons) Auto add when you click a paper, rather than pressing add. (click enter or on mouse press as opposed to a button.) Didn't click apply filter button.

P6 Missed semester 2 at first. (didn't read fully) Didn't notice the function of the slider for the duration of the experiment. (thought the slider was for weeks not different timetables) - Slider is too hidden. Functionality isn't clear. Pressed select filters multiple times after generating the timetable.

P7 Pressed enter instead of add. (not really an issue). Clicking on the papers shown on the calendar which didn't do anything. Didn't notice the slider for the first half of the session. (didn't know it was a slider that can be scrolled). Was confused on what the slider does.

P8 Clicked add button before selecting paper. Read the slider prompt but didn't realize the function of the slider, and clicked "generate timetable" button multiple times. I had to click "Generate timetable" button after clicking "today" button because I lost the view of the calendar.

P9 Reset the timetable after clicking the today button.

P10 I tried to click and drag papers shown in the calendar. I was scrolling up and down alot because I don't know what to do. Next/Prev buttons between weeks covered. Thought the days off filter was selecting days off rather than filtering the list.

**Did you have any other comments**

P1 If there were a lot of papers, I'm not sure a slider would be the best way to check timetables.

P2

P3

P4

P5

P6

P7 Struggled to identify whether classes clashed or not.

P8

P9

P10
